

Dover Bearings & Compression Appoints Plant Manager

White Lake Partners is pleased to announce that its client, Dover Bearings & Compression, has appointed Carla Manning as Plant Manager of their operations facility in Jeffersonville, IN.

Carla will be responsible for the manufacturing activities for the Jeffersonville location which includes purchasing, material movement, maintenance, production scheduling, manufacturing engineering and quality assurance. She will also be responsible for improving CI processes at the plant through lean initiatives. Cara has 20 years of manufacturing experience having worked for Eastman Kodak Company, Hexion Specialty Chemical D.D. Williamson & Co. and Lubrizol. In her most recent role as an Advanced Materials Operations Manager for Lubrizol's Louisville, KY facility, Carla was responsible for leading a 24/7 CPVC Manufacturing and Compounding union operation where she drove lean manufacturing and TPS improvement projects, capital budgets and maintenance for the facility.

Carla received her Master of Business Administration in Accounting from Indiana Wesleyan University University in 2009. She received a Master of Science in Engineering Management from Syracuse University in 2001. She earned her Bachelor of Science in Chemical Engineering from the Syracuse University in 1998.

Dover Bearings & Compression was created in 2015 when Dover Corporation combined two businesses, Cook Compression and Waukesha Bearings, forming the new entity, Dover Bearings & Compression. These businesses manufacture specialized industrial components that are used throughout energy exploration, production, and distribution markets. Product offerings include bearings, bearing isolators, seals and compressor components that are used for rotating machinery applications such as turbo machinery, motors, generators and compressors used in energy, utility, marine and other industries.
